

Ayesha Sikander

Dynamic React.js Developer crafting responsive and intuitive user interfaces. Skilled in modern front-end technologies, with a keen eye for design and a focus on performance optimization. Delivers clean, efficient code to create seamless web experiences.

EXPERIENCE

724.one, Johar town Lahore — React js Developer

Feb 2024 - Current

I'm an React.js Developer at 724.one, leading client projects and collaborating across teams to deliver top-notch solutions that exceed expectations and build lasting client relationships.

DIH Sanatzar, Muzaffargarh— Intern

(TWO Month)

Led computer skills workshops for students, imparting practical knowledge. Played a key role in student data management on the portal. Gained hands-on experience in various office responsibilities

PROJECTS

Preferential— Company's Project

Developed a web app for Preferential, supporting secure payments, user profiles, and rental transactions to promote the Preferential mobile app.

Edges— Company's Project

Developed a business marketplace platform for managing client and business profiles. Simplifies data management and streamlines business operations.

Shareikna— Company's Project

Developed an admin panel for efficiently managing user data and system settings. Enhances workflow automation, improves control over system functions, and simplifies data management.

Body Mappr— (Patient History Visualizer) Company's Project

Led the creation of Body Mappr, a web app enabling doctors to visually mark patient history on a body map, store data, and share it via email. Built from scratch to streamline patient data management.
