## EXPERIENCE

### React.js Developer

#### 724.One, Lahore | February 2024 - Present

- Developed modern web applications using React.js with focus on performance optimization
- Built responsive and mobile-first user interfaces using CSS frameworks and component libraries
- Implemented advanced state management solutions using Redux Toolkit and React Query
- Collaborated with designers and backend developers in an agile environment

### React.js Developer

#### PenAndWeb, Lahore | August 2024 - December 2024

- Built interactive React applications with emphasis on user experience.
- Developed responsive interfaces using modern CSS frameworks and component libraries.
- Implemented client-side routing and navigation using React Router.
- Integrated RESTful APIs and managed application state effectively.
- Collaborated with design teams to implement user-centric features.
- Participated in code reviews and maintained high code quality standards

## PROJECTS

### BodyMapper— *Health Visualization Platform*

- A health visualization platform for storing, updating, and sharing patient history using interactive body diagrams.
- Enabled pin creation, editing, and deletion on body parts, integrated Google/Facebook login, and Stripe payment for extended access.

### BySim— *eSIM Management Platform*

- Integrated eSIM and Maya APIs to fetch packages and generate QR codes for eSIM activation.
- Developed features for QR code PDF generation and downloading, along with admin panel functionality for eSIM tracking and management.

### Edges— *Business Management Marketplace*

- A marketplace for managing and optimizing business, freelance, and restaurant profiles.
- Implemented UI components, API integrations, and real-time features such as comment and chat sections.

### Preferential— *Property Rental Platform*

- An online property rental platform integrated with PayFast for secure transactions.

### Admin Dashboards—

- Admin panels for managing data, users, and system operations for various platforms.
