EXPERIENCE

React.js Developer
724.One, Lahore | February 2024 - Present
- Developed high-performance React.js applications with scalable state management using Redux Toolkit and React Query.
- Built responsive, mobile-first user interfaces using modern component libraries (Ant Design, Material UI, etc.) and CSS frameworks (Tailwind, Bootstrap) to deliver seamless user experiences.
- Collaborate with designers and backend developers in an agile environment to define, design, and ship new features.

React.js Developer
PenAndWeb, Lahore | August 2024 - December 2024
- Built interactive and user-centric React applications by implementing client-side navigation with React Router and integrating RESTful APIs.
- Developed dynamic interfaces and effectively managed application state to ensure a smooth front-end experience.
- Maintained high code quality standards through active participation in code reviews and collaboration with the design team.

PROJECTS

Winco— *AI-Powered Telegram Learning Bot*
- Developed Telegram Mini App with AI-generated quizzes and interactive lessons using React Query for server-state management.
- Built responsive UI with Ant Design and Tailwind CSS, including automated certificate generation feature.

BodyMappr— *Health Visualization Platform*
-Interactive health visualization platform for storing, updating, and sharing patient history with body diagrams.
- Features pin creation/editing, Google/Facebook login, and Stripe payment integration.

BySim— *eSIM Management Platform*
- Integrated eSIM and Maya APIs to fetch packages and generate QR codes for eSIM activation.
- Developed features for QR code PDF generation and downloading, along with admin panel functionality for eSIM tracking and management.

Edges— *Business Management Marketplace*
- A marketplace for managing and optimizing business, freelance, and restaurant profiles.
- Implemented UI components, API integrations, and real-time features such as comment and chat sections.

Admin Dashboards—
- Admin panels for managing data, users, and system operations for various platforms.
